EBSCO TRAINING WORKSHOP

TOPIC: "UNLOCKING THE POWER OF EBSCO: SMART RESEARCH STRATEGIES FOR FACULTY"

SPEAKER: MR. LAKHPAT SINGH, TRAINING MANAGER (INDIA NORTH), EBSCO

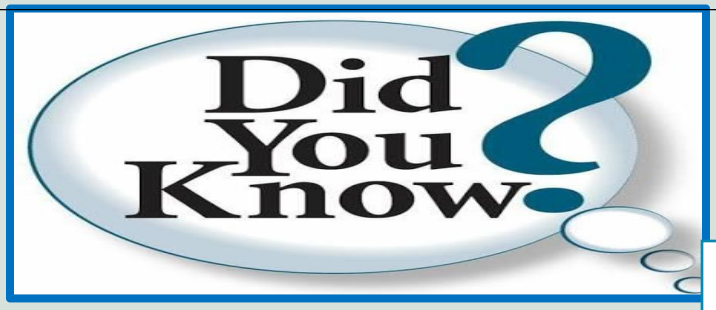

DATE: 24TH AUGUST 2026

1. The word "hotel" has French roots
The modern word hotel is derived from the French hôtel, which originally referred to a large townhouse or residence.

2. Restaurants were not always restaurants
The word restaurant comes from the French restaurer, meaning "to restore." Early establishments offered restorative broths and foods.

3. The chef's tall hat has a history
The traditional chef's toque became associated with professional kitchens during the development of modern French cuisine and kitchen organisation.

4. Croissants have a fascinating history
Although strongly associated with France today, the croissant has historical connections to the Austrian kipferl, a crescent-shaped pastry.

5. Coffee houses became centres of social life
Coffeehouses in Europe became important places for conversation, business, intellectual exchange and social interaction.

6. The concierge has an interesting origin
The French term concierge historically referred to a person responsible for managing a building or household. In modern hotels, the concierge helps guests with arrangements, recommendations and local services.

7. The hotel bell is more than a symbol
Before telephones and digital communication, hotel bells were an important way for guests to request assistance from hotel staff.

8. Tourism is much older than modern hotels
People have travelled for trade, pilgrimage, education, health and leisure for thousands of years. Organised tourism developed gradually alongside transportation and accommodation.

9. Food can be a reason to travel
Culinary traditions are an important part of cultural tourism. Local dishes can help visitors understand a destination's history, geography and culture.

10. Inns played an important role in early travel
Before modern hotels, travellers often depended on inns, caravanserais and other forms of roadside accommodation.

11. The word "hospitality" has an ancient connection
The idea of welcoming and caring for guests has deep roots in many cultures and ancient civilisations.

12. Restaurant menus have evolved dramatically
Early dining establishments often offered a limited selection of dishes. Modern menus can contain extensive choices covering multiple cuisines and dietary preferences.

13. Farm-to-table is not entirely new
Using locally produced food is a modern hospitality trend, but historically many communities naturally relied on ingredients produced close to where they lived.

14. Hotels are becoming technology-rich spaces
Today's hotels can incorporate mobile check-in, digital room keys, smart-room controls, automated communication and AI-supported guest services.

15. A hotel can be a destination itself
Some historic and iconic hotels attract visitors because of their architecture, heritage, design, restaurants or cultural significance—not merely because they provide accommodation.
